Dear Ms. Cathy Bechtel,

It has recently come to our attention that there are pending plans to develop a local freeway throughway resulting in the demolition of our home and property. Though we have not made any formal complaint regarding this matter, it is not because of lack of concern, more, due to a lack of knowledge of this inconsiderate and unacceptable proposal. The plans sited on your website show multiple considerations of which 2,(Alt. 4 & 5) out of 6 directly incorporate our home as well devastatingly diminishing our property value in at least two of the others (Alt. 6,7).

This letter is to inform you that we are currently seeking personal as well as community supported legal representation and are prepared to actively fight these proposals to the fullest extent. These proposals not only place a hazardous pollution directly adjacent to a county reservoir (which doesn't even allow row boats for the sake of environmental and health concerns), it irresponsibly & needlessly destroys the only low lying estate community in the Lake Mathews area while less than a quarter mile in either direction, nearly no home or families would be so severely affected. The threat of these proposals alone have already made it impossible to sell our property thus creating undo hardship on our community and our families. We sincerely request and highly suggest you abandon these devastating proposals and pursue alternative options (such as alternative 9) to relieve our community of this burden and avoid the certain extensive and costly future litigation.

Thank you,

Patrick L. Huston DDS Cert.
