

Mid County Parkway -
Att. Cathy Bechtel
and Juan Perez

12-8-08

RECEIVED
DEC 17 2008

RIVERSIDE COUNTY
TRANSPORTATION COMMISSION

As home owners in this area, we are very against this project - we have been attending the meetings, and see no reason for such an expensive, and uncalld for development -

The project is not compatible with the surrounding area. The cost to tax payers alone should be enough to stop it! People are having enough trouble keeping their homes, paying taxes and feeding families, and animals.

To sit in on these meetings hearing the big talk, and looking at all the project development planned by people who do not live here like Juan Perez - Cathy Bechtel is like hearing all over again why we moved from Norco over 20 years - The 15 freeway did nothing for the people of Norco, except ruin horse and animal property.

The traffic to the area, fire zoning, animals, flooding - is just

Unheard of! Our roads in this area are so bad - we have very little fire, and police protection. We never get any help or roads from the county. Most is paid for by the home owner - we are also responsible for any damage to cars or people - So now we are to bring more problems to the area.

Why would any county personal holding a job in Riverside not think twice about the people in this area. We are neglected in every way, now we are expected to bring big trucks in to wipe out all open spaces -

We are here because of open space which is very hard to find in Riverside. We put up with bad roads - crime here and taxes to keep this area one of the few, free from developers who want to turn it into freeway and parkway so that March Air Force Base can be turned into the next hub pick on an area that is already developed for this.
