CITY OF MORENO VALLEY
Planning Division

4-1-13

Attention: John Terrell

I received a letter from a Charles Mosthart regarding the "World Logistics Center Development". I do not know who he is and the charges he recommended to the Center and the affects it will have on our area.

I have been concerned ever since Sketchers went in. It was just a prelude to more Warehouse in the east end and that is exactly what is happening. No projects such as this Grotesque Center should ever be built next to homes and Bird Sanctuaries. The 60 freeway coming and going is much to narrow and dangerous for more Truck Traffic. Where will the State and Caltrans get the money to expand the freeway thru the Badlands of California as critically in debt? Without that guarantee that in itself should forbid this project of such

enormous size to be built.

Noise pollution, additional traffic, being built next to homes and Wildlife preserves are beyond reasonable, it is dangerous health wise and for traffic driving thru Ballands that has already proven how unsafe it is.

They state it will eventually bring 20,000 jobs. That is quite a sum if true, but the dangers involved and the effects on homeowners with families is very serious. Look what it has done to Mira Jones.

Charles Moothart brought up some changes that should have been part of the ^{original} plan. I am sure he is part of this project also and that is suspect also.

Respectfully,

Tom P. Weber
